**BALLY SENTE MAINFRAME
Master Cable Modification Notice**

The Master Cable Assembly in your Bally Sente Mainframe Unit (Sac 1, Sac 1A, Sac 1B, Sac-Man or C.T. Mainframe) may have (as shown in its wiring diagram):

1. One wire connected between jack connector J14 (to coin door) & jack connector P19 (to power supply).
2. One wire connected between jack connector J20 (to control panel) & jack connector P19 (to power supply).

If not, then Master Cable Assembly must be modified (using Master Cable Kit) as follows:

- A. Cut green or green-white (G-W) wire at location K of cable connector P7 (22-position).
- B. Connect green-white (G-W) wire from kit to cable connector P19 at pin 10 (to power supply). Connect other end of wire, using wire nut, to cut wire going to coin door jack connector J14 at pins 5 & 8 (Sac 1, Sac 1A, & Sac 1B); pin 3 (C.T. mainframe) or loose wire going to two "12V" positions on J14 (Sac-Man).
- C. Cut green or green-red (G-R) wire at location L of cable connector P7.
- D. Connect green-red (G-R) wire from kit to cable connector P19 at pin 11 (to power supply). Connect other end of wire, using wire nut, to cut wire going to control panel jack connectors J16 at pin 5 and J20 at pin 5.

Name That Tune game review

Please disregard Self-Test and Attract Mode information shown on page 6 of Bally-Sente Field Conversion Kit Manual (M051-00C47-A019). Refer to information on this page instead.

Self Test

Due to the tremendous amount of data in this game, no Self Test is available.

Attract Mode

- When game is first powered on, a blank screen with the message, "Please stand by..." appears for approximately 10 seconds while the sound board is being initialized. When the message begins to pulsate, final initialization will be taking place. If there are any sound board error modes, they will be displayed at this time.
- Title screen will appear (approx. 18 seconds).
- Tune Topics screen with four song titles will appear (approx. 18 seconds).

If attract sound is enabled, 1 out of every eight screens will play a song.

- High score screen will appear (approx. 18 seconds).
- Cycle repeats from step 2.

Game Description

Name That Tune is a 1 or two player game. The game consists of three rounds: Tune Topics, Bid A Note, and a bonus round called Golden Medley. In order to play the bonus round, the player must obtain a switch-selectable number of points; or this round can be selected to always be played. The basic play consists of hearing a song play and selecting one of four choices using the answer buttons.

Play begins with the computer randomly choosing a Topic, e.g., "For the Birds", which contains such songs as Woody Woodpecker, When Doves Fly, etc. The player(s) then hear the first song from the Topic. Four Song Titles are displayed on the monitor. As the song plays, the song value and bonus value for the round count down. The faster the player answers, the higher his score. In a two player game, an incorrect answer gives the other player a chance to correctly answer the tune. If neither player wins, no bonus points are awarded. The number of songs heard in each round is switch-selectable (best of 5 or best of 7).

The next round is Bid A Note. A clue is displayed, e.g., "A 1972 Top 10 Hit"; The player(s) then "Bid" on the number of notes they need to name the tune. The lower the bid, the higher the song value. The bidding starts at 9 and can go down to 1. In this round, only the melody of the song is heard as played on a piano. In a two player game, an incorrect answer causes the points to be awarded to the other player.

The Golden Medley can always be played or set to be played only on scoring 5,000, 18,000, or 21,000 points. This is played only by the winning player in a two player game. The player has 15 seconds to name five songs correctly. He may pass and go on to the next song. An incorrect answer ends the game and no bonus points are scored.

Whether or not the correct answer is displayed is switch-selectable.

Important Note: Please be advised that when converting a game it is advisable that all former trademark and copyright registrations be removed in the conversion process.

PROCEDURE FOR PIN NUMBERS.

- THE MASTER CABLE ASSEMBLY IN YOUR BALLY-SENTE MAINFRAME UNIT (SAC 1, SAC 1A, SAC 1B, SAC-MAN OR C.T. MAINFRAME) SHOULD HAVE (AS SHOWN IN ITS WIRING DIAGRAM):
1. ONE WIRE CONNECTED BETWEEN JACK CONNECTOR J14 (TO COIN DOOR) & JACK CONNECTOR P19 (TO POWER SUPPLY).
 2. ONE WIRE CONNECTED BETWEEN JACK CONNECTOR J20 (TO CONTROL PANEL) & JACK CONNECTOR P19 (TO POWER SUPPLY).
- IF NOT, THEN MASTER CABLE ASSEMBLY MUST BE MODIFIED, (USING MASTER CABLE KIT) AS FOLLOWS:
- A. CUT GREEN OR GREEN-WHITE (G-M) WIRE AT LOCATION K OF CABLE CONNECTOR P7(22 POS).
 - B. CONNECT GREEN-WHITE (G-M) WIRE FROM KIT TO CABLE CONNECTOR P19 AT PIN 10 (TO POWER SUPPLY). CONNECT OTHER END OF WIRE, USING WIRE NUT, TO CUT WIRE GOING TO COIN DOOR JACK CONNECTOR J14 AT PINS 5 & 8 (SAC 1, SAC 1A, & SAC 1B); PIN 3 (C.T. MAINFRAME) OR LOOSE WIRE GOING TO "12V" POSITIONS ON J14 (SAC-MAN).
 - C. CUT GREEN OR GREEN-RED (G-R) WIRE AT LOCATION L OF CABLE CONNECTOR P7.
 - D. CONNECT GREEN-RED (G-R) WIRE FROM KIT TO CABLE CONNECTOR P19 AT PIN 11 (TO POWER SUPPLY). CONNECT OTHER END OF WIRE, USING WIRE NUT, TO CUT WIRE GOING TO CONTROL PANEL JACK CONNECTORS J16 AT PIN 5 AND J20 AT PIN 5.
